

VISHAL PANDIT

Front End Engineer | React.js Specialist

Kolkata, West Bengal, India | +91-6291321550 | vishalpandit787@gmail.com | [linkedin.com/in/vishal-pandit999](https://www.linkedin.com/in/vishal-pandit999)

PROFESSIONAL SUMMARY

Results-driven Front End Engineer with 3.5+ years of experience building scalable, high-performance React.js and Next.js applications for enterprise digital experiences at Accenture, where I was promoted from Associate to Analyst level. Proven expertise in TypeScript, object-oriented programming concepts, component-based architecture, REST API integration, and modern state management (Redux Toolkit, Zustand). Adept at writing clean, maintainable, and efficient code that delivers pixel-perfect, accessible (WCAG 2.1) interfaces with measurable performance, scalability, and security improvements. Experienced in Agile/DevOps delivery, cross-functional collaboration, and mentoring junior developers.

CORE SKILLS

Frontend	React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, JSX
Styling & UI	Tailwind CSS, CSS Modules, Bootstrap, Responsive Design, Figma
State Mgmt	React Hooks, Context API, Redux / Redux Toolkit, Zustand
Testing	Jest, React Testing Library (RTL), Component Unit Testing
Accessibility	WCAG 2.1 Standards, ARIA Attributes, Semantic HTML, Keyboard Navigation
Performance	Lazy Loading, Code Splitting, Memoization, Core Web Vitals (LCP, FID, CLS)
APIs & Data	REST APIs, Axios, JSON, GraphQL (Exposure), Error Handling
Routing	React Router v6, Next.js App Router, Dynamic Routing, Protected Routes, SSR, SSG
Tools	Vite, Webpack, Git, ESLint, Prettier, Node.js, Agile/Scrum, DevOps
Cloud & AI	Microsoft Azure (AI Fundamentals Certified), AWS Service Monitoring, Prompt Engineering, Embeddings, RAG (Retrieval-Augmented Generation), Vector Databases, AI Output Evaluation

PROFESSIONAL EXPERIENCE

Custom Software Engineering Analyst — Accenture, Kolkata

September 2024 – Present

- Architected and delivered scalable, responsive React.js UIs for enterprise digital experience applications, achieving 35% improvement in development efficiency through reusable component libraries and consistent design patterns, while adhering strictly to coding standards.
- Built and deployed Next.js applications leveraging SSR (Server-Side Rendering) and SSG (Static Site Generation) to improve page load performance, SEO, and Core Web Vitals across enterprise platforms.
- Led migration of legacy components to TypeScript, improving type safety, reducing runtime errors, and enhancing long-term code maintainability across the team.
- Integrated 10+ RESTful APIs using Axios, implementing robust error handling, loading states, and data caching strategies for seamless dynamic UI rendering.
- Implemented WCAG 2.1 accessibility standards including ARIA roles, semantic HTML, and keyboard navigation to ensure inclusive user experiences across enterprise platforms.
- Optimized application performance using React.memo, useMemo, useCallback, lazy loading, and code splitting — improving Core Web Vitals scores and reducing bundle size.
- Established and enforced front-end best practices (ESLint, Prettier, code review standards) across the team, ensuring clean, maintainable, and efficient code; continuously evaluated and improved performance,

scalability, and security of software — resulting in a measurable reduction in UI defects and faster delivery cycles.

- Collaborated with backend, design, and QA teams in Agile/Scrum sprints to align on requirements, triage bugs, and ship high-quality features on schedule.
- Mentored 2 junior developers through pair programming, code reviews, and structured onboarding to team coding standards.

Custom Software Engineering Associate — Accenture, Kolkata

October 2022 – August 2024 | 1 Year 11 Months

- Developed and maintained dynamic, responsive React.js web applications for enterprise clients, contributing to core feature delivery across the full frontend stack.
- Integrated RESTful APIs using Axios, built reusable UI components, and resolved technical bugs to ensure timely delivery of high-quality frontend features.
- Participated in Agile/Scrum ceremonies, collaborated with cross-functional teams, and implemented UI improvements based on design specifications and QA feedback.

KEY PROJECTS

AWS Services Downtime Monitoring Application

Accenture Internal Tool | React.js, Axios, REST APIs, Real-time Dashboards

- Developed an internal real-time monitoring dashboard tracking downtime across multiple AWS services supporting client production applications.
- Built reusable React components for status indicators, alert mechanisms, and trend charts, enabling operations teams to respond to incidents 40% faster.
- Implemented API polling and state-driven UI updates using React Hooks, ensuring real-time data freshness without full-page refreshes.
- Improved incident response time by enabling teams to instantly visualize and act on service interruptions through intuitive visual dashboards.

Business Acquisition Risk Analysis Application

Accenture Client Project | React.js, Multi-step Forms, TypeScript, Report Generation

- Delivered a guided multi-step workflow application enabling structured capture and analysis of key risk factors in business acquisition evaluations.
- Designed and built a clean, accessible UI supporting complex navigation flows, reducing user errors in form completion by enforcing validation and inline guidance.
- Developed automated risk mitigation recommendation features that compiled stakeholder-ready final reports, reducing manual effort in the acquisition review process.
- Applied TypeScript throughout the project to enforce strict data contracts between frontend components and backend APIs, eliminating an entire class of runtime bugs.

EDUCATION

Bachelor of Technology in Computer Science

Techno International New Town, Kolkata | Graduated: 2022 | CGPA: **8.5 / 10**

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals | Microsoft | 2025

Certified in AI fundamentals, machine learning concepts, and Azure AI services.

Phase 1.2: Build Products and Launch an AI-Powered Business | House Of Edtech | 2026

Certified in AI product development, building and launching AI-powered products, and LinkedIn optimization with AI.

Phase 1.1: AI Fundamentals & Ecosystem Mastery | House Of Edtech | 2026

Certified in Large Language Models (LLMs), Generative AI, AI tools for research, and 10x productivity workflows.
